

**Board for Financing Water Projects
Workshop – June 28, 2006
Carson City, Nevada**

Meeting Notes

Regulation Changes

- Changes to the NAC 349.430 – 349.574 (inclusive) were previously proposed and drafted by LCB in June 2004 but were never finalized. Staff sent the Board a copy of the last marked up set of regulations (NAC 349.430 – 349.574) in preparation for a public workshop held on June 28, 2006, to review previous changes and make additional necessary updates.
- Public workshop notices were posted as required by NRS 233B.0607.
- The proposed amendments will update the regulations governing Grants for Capital Improvements to Publicly Owned Water Systems, NAC 349.430 to NAC 349.574, inclusive. The proposed amendments are necessary due to the program being moved from the Division of Water Planning to the Division of Environmental Protection, the addition of eligible projects authorized by the Legislature and the changes in the fee structure for the program. The Board reviewed the original and newly proposed changes for incorporation into the regulation.
- The changes to the regulation do not have any adverse or beneficial effects to grant applicants. The regulation generally changes wording to reflect changes in internal agency organization and more accurately reflect the process for grants to eligible recipients.
- Staff will distribute updates from the LCB Legal Division for the next Board meeting scheduled for August 23, 2006. The Board will then decide if it will take the action to adopt the updates to the regulation.
- No public comment was received at the meeting. Persons wishing to comment on any of the proposed regulation changes may still submit their comment, in writing, within thirty (30) days of the date of newspaper publication, June 23, 2006.
